Summary

Backend Software Engineer with hands-on experience building AI-powered systems, scalable REST APIs, and production-grade DevOps pipelines. Proficient in Python, FastAPI, Node.js, and LangGraph multi-agent architectures. Strong background in PostgreSQL optimization, Docker-based CI/CD, AWS infrastructure, and RAG pipelines. Passionate about high-performance backend engineering and shipping production-ready systems.

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, SQL, Go

Backend Frameworks: FastAPI, Node.js, Express

Cloud & DevOps: AWS (EC2, S3, IAM), Docker, Kubernetes, GitHub Actions, CI/CD, Linux

Databases: PostgreSQL, MongoDB, Redis, ChromaDB

AI / ML: LangChain, LangGraph, RAG Pipelines, PyTorch, Scikit-learn, HuggingFace

Blockchain: Solidity, Ethers.js, Hardhat, Web3.js, Solana

Testing & Performance: pytest, Jest, Selenium, JMeter, API Testing, WebSocket Testing

Core Concepts: REST APIs, System Design, Microservices, Distributed Systems, OOP, Data Structures, Algorithms

Experience

Graduate Trainee | Tata Consultancy Services

May 2025 – Nov 2025

- Built an AI-powered VS Code extension automating bug detection, code fixes, and report generation, reducing manual review effort by 40%
- Designed and implemented a RAG-based semantic search pipeline using FastAPI, LangChain, and ChromaDB with SSE streaming, improving retrieval accuracy by 30%
- Developed scalable REST APIs serving 10k+ requests/day; reduced average response time from 850ms to 480ms through query optimization and caching
- Optimized PostgreSQL queries via indexing and execution plan analysis, reducing database latency by 35%
- Implemented Docker-based CI/CD pipelines with GitHub Actions, cutting deployment time by 50%
- Conducted API, WebSocket, and load testing using pytest and JMeter, improving system reliability under concurrent traffic
- Collaborated in Agile sprints, contributing to production releases and peer code reviews

Backend Engineer | Perfect Engineering

Dec 2023 – May 2025

- Designed modular microservice backend systems using Python and Node.js powering AI-driven workflows
- Built ML pipelines with PyTorch and Scikit-learn, improving model prediction accuracy by 25%
- Engineered REST APIs with PostgreSQL handling concurrent client requests with caching and query optimization
- Reduced infrastructure costs by containerizing services with Docker and optimizing AWS EC2 resource utilization
- Implemented CI/CD pipelines via GitHub Actions, automating testing and reducing release cycle time by 40%
- Contributed to distributed system design, AI agent workflow automation, and production deployments in Agile sprints

Projects

AI News Aggregator (NewsAI)

newsai.atharvanaik.me | github.com/Atharva0506/news-app

- Architected a multi-agent LangGraph pipeline (Collector → Classifier → Summarizer → Bias Analyzer) with SSE streaming and automatic Gemini-to-Groq LLM fallback
- Built FastAPI backend with PostgreSQL and Redis caching, handling 5k+ daily requests with 40% faster API response times
- Integrated Solana on-chain payments for premium subscription tiers, JWT auth with refresh-token rotation, and PWA support
- Containerized full stack with Docker Compose and automated CI/CD via GitHub Actions

Chaininvoice : Open Source Contribution

chaininvoice.stability.nexus | github.com/StabilityNexus/Chaininvoice (5 ★ 37 forks)

- Contributed to a decentralized invoicing platform under the StabilityNexus org using Solidity, Ethers.js, and Hardhat
- Designed backend APIs and smart contract integrations enabling trustless B2B invoicing on-chain

Smart VS Code Assistant

- Built backend services for intelligent code analysis and automated bug detection, reducing debugging time by 35%
- Designed document retrieval APIs using RAG architecture with LangChain and ChromaDB for context-aware code suggestions

Nakama AI Companion

- Built conversational backend services with secure and scalable REST APIs
- Optimized PostgreSQL queries improving performance and reducing response latency by 30%

Education

Savitribai Phule Pune University Master of Computer Applications (MCA)	Sep 2024 – Jun 2026
MMCC Pune Bachelor of Computer Applications — CGPA: 9.49 / 10	2021 – 2024

Certifications

- MongoDB Associate Developer
- Microsoft Azure DevOps Engineer Expert (AZ-400)
- Complete Machine Learning & Data Science Bootcamp
- DevOps + Web Development Cohort

Achievements

- Winner — Tech Setu Hackathon 2023
- Silver Medalist — C Debugging Competition
- 2nd Rank — Web Designing Competition
- Represented at Avishkar Zonal Level Research Project Competition
